

THE **RWANDA GREEN FUND** IS A GROUNDBREAKING NATIONAL FUND FOR THE ENVIRONMENT AND THE **ENGINE OF GREEN GROWTH** IN RWANDA.

The Fund invests in the best and public projects that have the potential for transformative change and that aligns with Rwanda's commitment to building a strong green economy. The Fund also provides expert technical assistance to ensure the success of its investments.

THE FUND IS KNOWN LOCALLY AS FONERWA.

RETURN ON INVESTMENT

US \$217

mobilised by the Fund for strategic climate resilience investments

45
INVESTMENTS

10 Calls for proposals completed

83,000

households provided with access to off-grid clean energy

30,000

hectares of watersheds and water bodies protected

46,000

hectares of forest and agroforestry coverage

118,000

people supported to adapt to climate change

24,000

hectares of land protected against soil erosion

127,000 Tonnes of carbon dioxide equivalent emissions mitigated

162,000 Green jobs created: 60 percent women and 40 percent men

THE FUTURE

The Rwanda Green Fund aims to be a dynamic, independent resource facility providing targeted financial and technical support to catalyse climate resilient development at scale, contributing to Rwanda's vision of becoming a low-carbon and climate resilient economy by 2050.

RWANDA GREEN FUND

THE RWANDA GREEN FUND INVESTS IN PUBLIC AND PRIVATE PROJECTS THAT HAVE THE POTENTIAL FOR TRANSFORMATIVE CHANGE AND THAT ALIGN WITH RWANDA'S COMMITMENT TO BUILDING A STRONG CLIMATE RESILIENT AND GREEN ECONOMY.

The Fund also provides technical assistance to ensure the success of its investments. Funding proposals are approved based on the evaluation to ensure their return on investment contributes to Rwanda's sustainable development.

PRIORITISING GREEN GROWTH

The Fund is an initiative of the Government of Rwanda to support environmental protection and deal with the impact of climate change – acting as the avenue through which development partners can contribute to Rwanda's green growth ambitions.

The Fund accepts contributions from both public and private institutions. The Government of Rwanda demonstrated its commitment to the Fund by

contributing seed capital of USD 9.4 million.

INVESTMENT AVENUES

Government ministries and agencies, districts, civil society organisations including academic institutions and the private sector can access this financing from the Rwanda Green Fund.

Investments must align with the Fund's eligibility criteria, and the project or programmes are assessed appropriately.

There are four financing priorities through which the Fund provides investment:

1. Conservation and Sustainable Natural Resources Management
2. Research and Development and Technology Transfer and Implementation
3. Environment and Climate Change Mainstreaming
4. Environmental Impact Assessment Monitoring and Enforcement

Funding proposals are approved based on careful evaluation to ensure their return on investment contributes to Rwanda's sustainable development, climate resilience and green growth.

GREEN CLIMATE FUND ACCREDITATION

Rwanda's Ministry of Environment is accredited to access project-based climate finance from the international Green Climate Fund (GCF).

The GCF accreditation will allow Rwanda to receive grants of up to US \$50 million to foster the country's transition to a green and sustainable economy.

RWANDA E-WASTE RECYCLING FACILITY

IN 2014, THE FUND INVESTED CLOSE TO **US\$1.5 MILLION** TO DEVELOP A NATIONAL E-WASTE MANAGEMENT STRATEGY.

Thanks to the Fund’s investment, Rwanda has now established an e-waste recycling facility, with the capacity to employ more than 1,000 people - making it the second state-of-the-art e-waste dismantling and recycling facility in Africa.

“ The first and most important benefit I am getting from working at the facility is new skills. I have realised that all the

electronic devices that we think are complex, are very simple. Additionally, I have financially grown from the salary I earn at the facility.

”

JEAN DE DIEU MUNYANKINDI, E-WASTE RECYCLING FACILITY TECHNICIAN

RWANDA GREEN FUND

PRIVATE SECTOR INVESTMENTS

To expand access to electricity, the Fund partnered with Novel Energy to invest in the construction of the **Gaseke Micro Hydro Power Plant**. The 500 kW plant is providing clean power to communities living around the Gaseke river and has created hundreds of green jobs.

US **\$4** million invested in the private sector

10 investments funded

22% of the Fund investments with the private sector

Through a grant from the Fund, **Zero Carbon Designs** has developed low-carbon, affordable dwelling units that can be pre-fabricated, mass-produced and constructed at low cost. The investment has created green jobs and increased the use of zero carbon straw board material in Rwanda's construction sector.

The Fund has invested in Ampersand to test, demonstrate and improve an electric motorcycle taxi (e-moto) and grid-powered battery charging system in Rwanda. The pilot aims to demonstrate that electric motorcycles are a cheaper, cleaner and higher performing alternative.

In 2015, the Fund partnered with Horizon Group to develop Green Housing Technical Studies. Thanks to this investment, a freely available masterplan for a sustainable neighbourhood has been created and development of demonstration units is underway.

Through a Fund Innovation Grant, **Standard Mining Company** is implementing a model mining project that complies with best environmental practices. The investment will sustainably develop and improve mine infrastructure and serve as case study to improve mining in Rwanda.

Through the Fund's credit line facility, **Novel Energy** has constructed a 70 kW rice husk to power plant in Rwanda's Eastern Province, introducing rice husk gasification for power generation technology to Rwanda and demonstrating the potential of this renewable energy.

In partnership with Kigali Farms, the Fund invested approximately US \$50,000 in sustainable biodiversity by providing a grant to map and domesticate Rwanda's mycological riches. This investment created an inventory of edible mushrooms in Rwanda's forest ecosystems, and identified species suitable for export and cultivation.

PRIVATE SECTOR FINANCIAL PRODUCTS

The Fund is introducing a number of financial mechanisms to increase its engagement with the private sector, as well as civil society.

Coolease is a financial mechanism encouraging adoption of efficient cooling technologies and use of climate-friendly refrigerant gases.

Coolease is provided by a financial institution to the client through a finance leasing agreement, in which the air conditioning or refrigeration system acts as collateral.

A dedicated leasing subsidiary is being set up by BDF to serve as a Special Purpose Vehicle to finance the cooling system for the client in exchange for monthly payments.

A Green Growth Guarantee Fund has also been set up by the Business Development Fund and FONERWA to mitigate loss in case of default.

INVESTING IN CLEAN ENERGY

The Fund supported Novel Energy to build a mini-hydro power plant in the rural area of Gakenke. The 500 kW Gaseke Hydro Power Plant has brought electricity to the local community with the extension of the national grid to off-take power from the plant.

The project created a number of full-time jobs and hundreds of green jobs during the construction phase, which have been filled by nearby residents.

2018 UN CLIMATE ACTION AWARDEE

The Rwanda Green Fund received the United Nations 2018 Momentum for Change Award for its outstanding contribution to addressing climate change.

The Fund was selected in the category of Financing For Climate Friendly Investment.

“ I have built a house and supported my younger brothers to study. It makes me happy that we are constructing something that will provide green electricity for the community and reduce deforestation. ”

MARTIN NZAYISENGA

“ The Gaseke Hydro Power Plant has changed my life. My work here is helping to develop my family and society. I am happy to be working here because I want to build a green Rwanda. ”
